The DBV valve is a direct operated pressure control valve cartridge type that can be used in blocks or panels with seat.

It is normally used to control the maximum pressure in the hydraulic circuits or as a limiting device for pressure peaks generated during hydraulic actuator movement variation.

It is available in different pressure control ranges up to 300 bar.

The circuit pressure acts on the shutter which is directly loaded by a spring on the opposite side. Once the set pressure is reached, the shutter opens, and discharges the excess flow in port T connected directly to the reservoir.

The pressure can be adjusted by a screw, equipped with locking nut and maximum adjustment limiter.

**CARTRIDGE TYPE**

- **p** max 380 bar
- **Q** max 120 l/min

**PERFORMANCES**

(measured with mineral oil of viscosity 36 cSt at 50°C)

**HYDRAULIC SYMBOL**

The diagram shows the hydraulic symbol for the DBV valve with ports P and T.
1 - IDENTIFICATION CODE

Direct operated pressure control valve
Cartridge type

Pressure adjustment range:

- 035 = up to 35 bar
- 050 = up to 50 bar
- 080 = up to 80 bar
- 100 = up to 100 bar

Seals:
N = NBR seals for mineral oils (standard)
V = FPM seals for special fluids

The company reserves the right to apply any modifications.

2 - CHARACTERISTIC CURVES (values obtained with viscosity of 36 cSt at 50°C)

3 - HYDRAULIC FLUIDS

Use mineral oil-based hydraulic fluids HL or HM type, according to ISO 6743-4. For these fluids, use NBR seals (code N). For fluids HFDR type (phosphate esters) use FPM seals (code V). For the use of other kinds of fluid such as HFA, HFB, HFC, please consult our technical department. Using fluids at temperatures higher than 80 °C causes a faster degradation of the fluid and of the seals characteristics.

The fluid must be preserved in its physical and chemical characteristics.

4 - OVERALL AND MOUNTING DIMENSIONS

Dimensions in mm

1 Socket hex adjustment screw: spanner 8 (standard)
2 Locking nut: spanner 17
3 Hexagonal spanner 24
4 OR type 130 (22.22x2.62) 90 Shore
5 Maximum screw stroke
6 Adjustment knob: K
