

PAPER MILLS

Application: paper mill plant

SUPPLY: Hydraulic power unit for paper mill industry press

CHARACTERISTICS OF THE SYSTEM:

- Power unit for high pressure with tank capacity of approx. 500 liters and double motor-pump group of 11KW /each, one of which remains in stand-by
- Use of 45 l/min variable displacement piston pumps in order to guarantee high pressures on the system
- Control of each port pressure through 3-way pressure reducing proportional valves with integrated electronics
- Independent group for fluid conditioning and filtering
